

Business Offer

A Swedish SME looking for Industrial cooperation partner within water sector, who can have manufacturing, marketing and distribution possibilities for an EU, ETV verified, patented innovation.,

Summary

An optical real-time monitoring and sampling system for early detection of micro-contaminantes in drinking water and water for reuse, can be used to predict and prevent micro-biological & chemical contamination in water. A partner who can inject finance and exploit our IP and trademark, advantages of the system to prevent biological & pharmaceutical contamination in water, provide real-time sampling for to be analysed and alarm and online removal solution. Licencing or equity deal is sought.

Description

Is an innovative Swedish SME at the forefront of the industry with a core mission of online early detection and sampling of microbiological, chemical and organic contaminants when it occurs in drinking, source and waste water for reuse and removal of it. Has over 40 years' combined experience of water plants and industries and have used this experience to create, demonstrate and try to market innovative products to ensure safe and clean drinking water and treated waste water for reuse. Early warning, monitoring & sampling system for water .

Advantages and innovations

- Early warning for micro-pollutants in water and provider of correct water sample for analyse from the time of contamination
- Cost effective Biological & Chemical safety, security & prevention of waterborne disease spreading. .
- No chemicals, no emissions low energy
- Recognizing contamination in an early stage can save lives and increase the possibility of finding solutions quickly.
- There is no system or competative product in the market today which can provide real-time water sampling.
- Innovation real-time information and sampled analysing results cannot be compared with random sampling technology of today it is ment for academic statistical information gathering.

COMPANY INFORMATION

Established: 1992

Turnover (€): <1M

Type, size and nation: Industry SME <= 10, Sweden

Already engaged in transnational cooperation: No

NACE keywords

- Water collection, treatment and supply

Sector Group: Environment
